0 Angular Start

How to start a project?

Complete new project
1. Download a template from the angular course.

2.Install Angular CLI

```
npm install -g @angular/cli
```

3.Usage

```
ng help
```

4.Generating and serving an Angular project via a development server

```
ng new PROJECT-NAME

cd PROJECT-NAME

ng serve
```

It can be already created installed angular files, you only need to add an angular project.

For an existing project
Go to your root folder for the angular app where the src, and other files are stored and

```
npm install -g @angular/cli
```
